Summary

A results-driven Software Engineer with 1 year of experience focused on backend development using Python. Proven ability to build scalable web applications and manage complex database systems. Strong experience with SQL, Docker, and deploying applications on AWS. A quick learner, eager to apply my skills to new frameworks like FastAPI.

Professional Experience

Software Engineer | DataCorp Analytics | July 2024 - Present

- Developed and maintained backend services for a data analytics platform using Python and Django REST Framework.
- Wrote complex SQL queries and optimized a PostgreSQL database to handle large volumes of data.
- Utilized Docker to create consistent development and production environments.
- Deployed applications on AWS EC2 instances managed with an internal deployment tool.
- Worked within an Agile team to deliver features in two-week sprints.
- Actively participated in peer code reviews to maintain high code quality.

Education

Bachelor of Engineering in Computer Engineering | Central College | Graduated May 2024

Skills

- **Languages:** Python, SQL, JavaScript
- **Frameworks:** Django REST Framework, Flask
- **Databases:** PostgreSQL, MySQL
- **Cloud/DevOps:** AWS (EC2, RDS), Docker, Bash Scripting
- **Version Control:** Git, Bitbucket
