Summary

A detail-oriented DevOps Engineer with 1 year of experience in automating infrastructure and deployment pipelines. Expert in containerization with Docker and orchestration with Kubernetes on AWS. Proficient in Python for scripting and automation. Eager to apply my infrastructure skills to support a dynamic software development team.

Experience

DevOps Engineer | CloudNet Services | August 2024 - Present

- Manage and maintain cloud infrastructure on AWS using Terraform and CloudFormation.
- Build and operate CI/CD pipelines to automate application builds, testing, and deployments.
- Administer Kubernetes clusters (EKS) for container orchestration.
- Write Python and Bash scripts to automate routine infrastructure tasks.
- Monitor application performance and ensure high availability.

Education

Associate of Science in Network Administration | Community College | 2023

Skills

- **Cloud:** AWS (Expert), GCP (Familiar)
- **DevOps:** Kubernetes, Docker, Terraform, Ansible, Jenkins, CI/CD
- **Scripting:** Python, Bash
- **Operating Systems:** Linux
- **Monitoring:** Prometheus, Grafana
