

About the Role

We are seeking a motivated and passionate AI/ML Engineer to join our dynamic team. In this entry-level position, you will play a crucial role in developing and deploying machine learning models that drive innovation within our tech solutions. This is an exciting opportunity for someone eager to learn and grow in the field of artificial intelligence and machine learning, while collaborating with experienced engineers in a supportive environment.

Key Responsibilities

- Assist in the development and deployment of machine learning models to enhance our product offerings.
- Support data collection and preprocessing to ensure high-quality inputs for model training.
- Collaborate with senior engineers on API design and model integration to streamline workflows.
- Perform model evaluation and documentation to maintain clarity and transparency in our processes.
- Contribute to code reviews and automation pipelines, fostering a culture of quality and efficiency.
- Stay updated on new machine learning techniques and best practices to continuously improve our methodologies.

Required Qualifications

- Proficiency in Python and experience with libraries such as Scikit-learn, TensorFlow, or PyTorch.
- Familiarity with FastAPI for building APIs and SQL (PostgreSQL) for database management.
- Basic knowledge of Docker for containerization and Git for version control.
- Understanding of AWS fundamentals to support cloud-based solutions.
- Strong problem-solving skills and a collaborative mindset.
- Eagerness to learn and grow in the AI/ML domain.

Preferred Qualifications

- Experience with machine learning projects, whether through internships, academic projects, or personal endeavors.
- Knowledge of additional programming languages or frameworks relevant to AI/ML.
- Familiarity with data visualization tools to communicate findings effectively.
- Understanding of software development best practices and agile methodologies.

Why You'll Love Working With Us

At our company, we believe in fostering a collaborative and inclusive environment where every team member can thrive. You'll have the opportunity to work alongside talented professionals who are passionate about technology and innovation. We encourage continuous learning and provide resources to help you grow your skills in AI and machine learning. Join us to be a part of exciting projects that make a real impact in the tech industry!
