Summary

QA Automation Engineer with a strong command of Python for developing automated test suites. Experienced in testing complex software systems, working within CI/CD pipelines, and using SQL for test data validation. Seeking a role that allows me to transition my technical testing skills into a software development capacity.

Experience

QA Automation Engineer | QualiTest Systems | July 2024 - Present

- Develop and maintain automated test frameworks using Python, Pytest, and Selenium.
- Write and execute automated tests for APIs and web applications.
- Integrate automated tests into the CI/CD pipeline (Jenkins).
- Write SQL queries to set up and verify test data in a PostgreSQL database.
- Report and track defects in Jira.

Education

Certificate in Software Quality Assurance | Tech Training Center | 2024

Skills

- **Languages:** Python, SQL, Java
- **Testing Tools:** Pytest, Selenium, Postman
- **CI/CD:** Jenkins
- **Databases:** PostgreSQL (for querying)
- **Version Control:** Git
